RE: Self-Implementing Polychlorinated Biphenyls (PCB) Cleanup
Former Satralloy Site
4243 County Road 74
Mingo Junction, Ohio 43938

Dear Mr. Holder:

The U.S. Environmental Protection Agency has reviewed the December 14, 2017, report documenting the cleanup conducted pursuant to 40 CFR 761.61(a) at the above-referenced facility. Based on our review, the document requires revision to:

1. Include a map showing locations of the verification samples.
2. Include laboratory results from the verification sampling. This may be provided in electronic format.
3. Document the recording, in accordance with State law, a notation on the deed to the property, or on some other instrument which is normally examined during a title search, that will in perpetuity notify any potential purchaser of the property:
 - (a) That the land has been used for PCB remediation waste disposal and is restricted to use as a low occupancy area as defined in §761.3.
 - (b) The applicable cleanup levels left at the site, inside the fence, and/or under the cap.

Please revise the report to include the requested information and provide a revised report within 60 days of this letter. If you have any questions, please contact me by e-mail at ohl.tamara@epa.gov or by telephone at (312) 886-0991.

Sincerely,

A handwritten signature in cursive script, appearing to read "Tamara Ohl", is written over the typed name.

Tamara Ohl
Project Manager
Land and Chemicals Division
